

## Gift Shop Mug Design

Term 2 in Design Technology will cover many aspects of design, as a class we will focus on 3D drawing techniques, design for purpose, creating appealing designs for a target audience, studying the market, photoshop CAD design and producing a final outcome.

You will learn how to create your own mug. We will start by creating a design, adapting it for the market then using CAD.

Keywords that you should become competent with:

CAD(Computer Aided Design): --

---

---

---

Mug Heat Press:

---

---

---

Tasks:

- Use the lines above to explain what CAD and mug heat press mean. Describe each process.
- Explain what target audience mean:

---

---

---

**Task:**  
Design the front and back of the mug based on an iconic designer .
